A few things you should know

Official definition of **Arts** Integration? **Arts** Integration is a term applied to an approach to teaching and learning that uses the fine and performing arts as primary pathways to learning. Arts integration differs from traditional arts education by its inclusion of both an arts discipline and a traditional subject as part of learning. The goal of arts integration is to increase knowledge of a general subject area while concurrently fostering a greater understanding and appreciation of the fine and performing arts.

Send your ideas **lickity-split!** Proposals will be reviewed on or before

December 1st. So remember what they say about the early bird...

Project budgets can be up to **\$5000**

Remember to answer: Who is your target group of students? Is there professional development for a teacher or group of teachers? Is this something that can be worked into the core curriculum year after year or can become part of the culture of your school?

To ensure the sanity of the artists and the quality of the program: We will not fund 'all school' target group residencies.

Important: The Arts includes creative endeavors in the visual arts, literary arts and the performing arts – music, theatre, dance and film, among others.
